# EXPERT & ORGANIZERS

- ❖ The experts include reputable professionals in various spheres of our life, people who have achieved the highest results in a particular industry, famous people, both in their own country and in the World. Experts review the nominees and make statements about them and then choose the Winners in each nomination.

# PROJECT LAUNCH

- ❖ The project started on March 15, 2005. A few years later, it received international recognition and support in the face of several of the world's authoritative industry associations. Over the past 10 years, the Organizing Committee of the Prize has been actively cooperating with UNICE and UNEP, being an active member of the UN Global Compact, fully interacting with the European Parliament, the Union of African States, the League of Arab States and other international associations.

# NEW ERA WORLD FORUM 2024

❖ From November 30 to December 5, 2024, a unique event took place at the Aamby Valley Resort, Lonavala – the first Global International Forum New Era, which brought together several hundred guests from many countries of the world. What made it unique was that for the first time, the initiators of the Forum were ordinary people. The main goal of the Global Forum New Era was to create a new international communication platform for exchanging experiences, discussing current issues and finding joint solutions for sustainable development and improving the quality of life of people in the crisis of a multipolar world.

- ❖ The New Era brought together everyone: famous politicians, businessmen, heads of public and private companies, authoritative experts, outstanding figures in science, culture, sports, and ordinary people who want to change this world for the better. In addition to conferences, numerous umbrella events, master classes, etc. were held in Aamby Valley.

- ❖ "The forum venues discussed the most important and pressing issues, of which there are many, and to which the current political elite does not give answers. "
- ❖ The summit was held in difficult conditions, but the main thing that all the guests and participants of the summit recognized is that a completely new international communication platform has appeared in the world, which can safely be called an alternative to the Davos Forum.

❖ We would especially like to say that one historical and unique event took place within the framework of the New Era World Forum. The summit ended with the ceremonial presentation of the first world public award "Golden Chariot" to the most outstanding people and companies in various spheres of human life and activity. Before the forum in India, there were simply no analogues to this project.

# PLANS FOR 2025

- ❖ The organizers have announced their intention to make it an annual event that will contribute to strengthening international cooperation and addressing global challenges in the context of the crisis of the multipolar world. A start was made for international dialogue in an ever-changing external environment by holding the New Era World Forum in India, which is planned to be held annually in the future.
- ❖ In 2025, the New Era Forum will be held under the auspices of the Year of Africa. Events will be held in Kenya and Senegal in July and October.
- ❖ The Final Forum "New Era. Africa. 2025" will be held in Zanzibar, Tanzania from December 1st to December 7th
